

You are invited

to our annual Bull Sale February 10, 2018 at the ranch.

We are celebrating our 60th Anniversary in the registered cattle business. Come see why we are still here!

Calving ease and we still maintain muscle and performance –

Our Angus bulls have generations of proven calving ease bred into them. Along the way, we have maintained muscle, bone and lower cost performance.

Gain on grass – Are you tired of “feed bucket cattle,” the kind you have to feed continuously to get any results? Very simply, our cattle have to survive on grass. We don’t creep feed and our “gain on grass” test helps us to identify genetics that excel on what Mother Nature provides. We design cattle to work for you instead of the other way around!

Dependability and longevity – Our bulls are developed with the cowman in mind and they are known to last in tough country. From Oregon to Florida, Bradley 3 Ranch bulls are known for their soundness, fleshing ability and longevity.
